Architectural Products for
Education Spaces.

Call them what you will; reckless hallgoers, rampant room destroyers, washroom grungifiers or wall funktifiers. One thing's for certain, students are hard on dorms and academic buildings.

That's why you need durable architectural products that pass the test when it comes to extreme wear and tear. Ensure your buildings achieve the look you want, even under the harshest conditions.

With products like high-impact wall protection, durable window shades, mold & vandal resistant washroom systems and robust elevator interiors, Inpro not only protects your buildings from constant damage, we also stop the endless maintenance cycle so your time and budget are protected, too.

Make a difference inside™ **your Education Spaces.**

From hectic hallways and chaotic classrooms to busy restrooms and bustling dormitories, students can put your school building interiors to the test. Inpro's commercial-grade architectural products are durable and sustainable, designed to endure the mayhem while maintaining optimal aesthetics. Let us help you break the cycle of endless repairs, allow for ease of cleaning + maintenance, and protect your time and budget. With Inpro, your educational spaces can thrive in both form and function. Because how your buildings feel inside and how the people within your buildings feel inside, that's what matters.

Experience the difference. Make a difference . . . inside.

Inpro Products Overview

Our products were developed to address your different building challenges so you can find all the solutions you need, in one place.

©Dam Schwalm

Door + Wall Protection

Protect walls from the impact of backpacks, chairs, moving carts and hallway traffic with our Door + Wall Protection products. Palladium® Rigid Sheet Wall Protection, Corner Guards, Aspex® Wall Protection and Wall Panels not only protect, but enhance your building.

Commercial Window Shades

Distraction prevention and comfort are essential for learning environments. Our WT Shade® line of commercial window shades provides the right amount of shade while giving students the benefits of natural light. Manual and motorized shades help block the sun's glare without sacrificing the view. Ask about our Best for Kids options!

Elevator Interiors

Our elevator panels are clad in the same durable material as our wall protection to save on constant maintenance and endless repairs. With a variety of colors, woodgrain patterns, custom imagery and the ability to add your logo, you'll make a lasting impression on visitors, donors and prospective students.

Washroom Systems

Made of Prism™ Solid Surface, our washroom systems inhibit the growth of mold and mildew and are easily repairable. Scratches, cracks and vandalism can easily be buffed out to keep your washrooms looking lavish.

Architectural Signage

We guide the way for students + staff with ADA interior architectural signage made to match your school colors.

Expansion Joint Systems

Our seamless Expansion Joint Systems allow for the natural shifting and movement of buildings and are engineered to handle every condition. From fire prevention to parking protection, we have you covered.

Product Spotlight

Learn more about wall protection for education settings.

Palladium® Rigid Sheet Wall Protection

Palladium® Rigid Sheet Wall Protection provides aesthetically pleasing, superior impact resistance to keep your walls safe from damage, so you can say goodbye to endless repairs.

Aspex® Printed Wall Protection

Get the high-impact durability of PETG Sheet with the clear, crisp imagery of digital printing. With Aspex® Printed Wall Protection, you won't have to worry about the image being scratched over time.

Ricochet® Flexible Wall Protection

Ricochet® Flexible Wall Protection combines the look of premium wall covering with the durability of rigid sheet, so your walls can make an impact and take an impact.

Palladium® 3D Trim

Get the look of real wood with the durability and impact resistance of wall protection with 3D Trim. Also use as a chair rail to protect your walls.

Corner Guards

Protect corners from damage and keep your facility looking newer longer with corner guards.

Continuum™ Wall Protection

Easy to work with, industrial-strength wall protection. Stable thermal properties allow the material to be used in areas with heat and humidity fluctuation such as locker rooms, kitchens and science labs.

Stainless Steel Wall Cladding

Stainless Steel Wall Protection provides industrial strength durability for the walls in your facility. Great for food prep and back of house areas.

Elevator Interiors

Our elevator panels are made with Palladium® Rigid Sheet Wall Protection material, making them extremely durable. Choose from standard panel configurations that you can personalize with different finishes and custom branding.

Prism™ Solid Surface Shower Bases + Walls

Made of Prism™ Solid Surface, our washroom systems inhibit the growth of mold and mildew and are easily repairable. Scratches, cracks and vandalism can easily be buffed out to keep your washrooms looking lavish. Ask about our ADA compliant options.

Prism™ Solid Surface Toilet Partitions

Our partitions are easily repairable against vandalism. Customize the door size and add trim to enhance privacy.

ADA Signage

Navigating the specifics of the Americans with Disabilities Act (ADA) can be daunting, not to mention costly. We can assist in creating a compliant program to help you avoid fines with a look that fit your branding.

Wall Art

Wall art is completely customizable so you can incorporate images that are impactful to your brand and specific to your location.

Manual Shades

Ideal for projects looking to manage natural daylight with an elegant and reliable energy-solution, our manual clutch and cordless shades offer the perfect blend of safety and affordability.

Motorized + Automated Shades

The perfect blend of fit, form and function, our motorized and automated shades are expertly engineered to be easily integrated with most building management and automation systems.

Project Profile

Mayville High School.

Mayville, WI

Architect: Bray Architects
Milwaukee, Wisconsin

Contractor: J.H. Findorff & Sons
Milwaukee, Wisconsin

The Project

A major expansion and renovation of the high school as part of a \$24.5 million district referendum. The addition to the high school will feature a new Science, Technology, Engineering, Art, and Math (STEAM) innovation center. It will house a new technical education shop for woods, metals, automotive, and manufacturing instruction, as well as an agriculture classroom/lab, greenhouse, and physical education space for weights and cardio. The high school will undergo significant renovation of its performing arts classrooms and rehearsal spaces.

Inpro® Products Used

A large-scale installation of Aspex® Printed Wall Protection was used in the new student entrance, along with Corner Guards and Custom Printed Signs.

Project Profile

Friendship Learning Center.

Fond du Lac, WI

Architect: Bray Architects
Milwaukee, Wisconsin

Contractor: CD Smith
Fond du Lac, Wisconsin

The Project

A 92,000 sq. ft. addition at Friendship Learning Center called "The World of Friendship" The Pre-K to 5th grade school serves more than 600 students annually. Funding for the project was secured through a \$27.5M referendum passed in April 2017, and the new addition formally opened in May 2019.

Inpro® Products Used

The inclusion of movable glass walls allows classroom pods to be converted into larger "learning lands". Aspex® Printed Wall Protection was used to designate these spaces - first graders are in Australia, second graders are in South America, third graders are in Asia, fourth graders are in North America, and fifth graders are in Europe. In addition, interior architectural signage using Inpro's Zurich® Standard Sign Design was installed throughout the entire new facility.

Project Profile

Forest Park Middle School.

Franklin, WI

Architect: Plunkett Raysich Architects - Milwaukee, Wisconsin

Contractor: JP Cullen - Milwaukee, Wisconsin

The Project

A new \$43M, 208,000 sq. ft. middle school serving students in grades 6th through 8th. The school features a two-story layout and will accommodate up to 1,350 students at capacity. Two key design elements were to provide an open collaborative learning environment, and to bring natural daylight into every room.

Inpro® Products Used

- 432 Floor Expansion Joint
- 300 Wall and Ceiling Expansion Joint
- 113 Ceiling Expansion Joint
- 615 Exterior Expansion Joint
- 651 Roof Expansion Joint
- 925 Fire Barrier
- Palladium® Rigid Vinyl Sheet in Shiprock color

- Aluminum Corner Guards

obsessed with protecting buildings®

How they look. How they function.
And how they protect the health and safety
of the people who use them every day.

That's why we make hundreds of architectural
products all under one roof and work tirelessly to
make sure you and your buildings succeed.

Yeah, we are obsessed. But we wouldn't
have it any other way.
